

ROPOX QUICKWASH

Simply
MOVING & SLEEPING

ROPOX[™]

BETTER WAYS TO BETTER DAYS

- A PART OF **AddLife**

The Ropox Quickwash is a height adjustable ceramic washbasin that can project away from the wall allowing easy access for wheelchair users.

The height of the washbasin can be adjusted, with minimal effort, using the release handle on the side of the basin. A position lock then secures the basin in place. As the basin is lowered, the unit moves out and down in a smooth motion. This height adjustment allows both standing and seated users to use the basin comfortably.

This easy to clean, simple, compact basin is perfect for smaller bathrooms. The versatile design allows the basin to be used by all the family.

The basin is supplied with flexible plumbing hoses and a thermostatic mixer tap. The basin is supplied pre-assembled for easy installation. The basin does not require electricity.

Please enquire for optional 5 and 10 year service warranties available.
