Simply
MOVING & SLEEPING

ROPOX™
BETTER WAYS TO BETTER DAYS
— A PART OF AddLife®

The height adjustable Ropox bathtub is the ideal bathing solution for those with limited mobility.

The height of the bath is easily adjusted using an electrical hand control. The caregiver can lower the bathtub, making it easier and more comfortable for the user to get in and out of the bath. The caregiver can then raise the bathtub to a suitable height, enabling healthy working conditions. The quick and easy height adjustment makes the bath suitable for use by the whole family.

The bathtub has sufficient room underneath to accommodate a mobile hoist, reducing the amount of heavy lifting for the caregiver. The design of the bathtub enables caregivers to work on either side or end of the bath.

The Ropox bathtub is available in three different lengths and can accommodate a user weighing up to 220kg. The sleek, simple design of this bathtub ensures it will suit any bathroom.

Each bathtub comes with a hand shower, mixer tap and plumbing kit as standard.

Additional accessories are available on request, including a shower bed cover, shower bed guards and brake wheels, allowing for a tailored package to suit individual needs.

Please enquire for optional 5 and 10 year service warranties available.
